## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP2003/008884

I. Basis of the report									
1. With regard to the elements of the international application:*									
		the international application as originally filed							
	$\boxtimes$	the des	cription:						
		pages							
ł		pages	, filed with the demand						
1		pages	, filed with the letter of						
	$\boxtimes$	the clai	ms:						
		pages							
		pages	, as amended (together with any statement under Article 19						
		pages	, filed with the demand						
		pages	2, 4, filed with the letter of04 March 2004 (04.03.2004)						
	$\boxtimes$	the drav							
		pages							
		pages	, filed with the demand						
		pages .	, filed with the letter of						
[		the seque	nce listing part of the description:						
		pages	, as originally filed						
		pages	, as originary fried , filed with the demand						
		pages	, filed with the letter of,						
ι	710 II	e element the lang the lang	the language, all the elements marked above were available or furnished to this Authority in the language in which all application was filed, unless otherwise indicated under this item.  s were available or furnished to this Authority in the following language which is: uage of a translation furnished for the purposes of international search (under Rule 23.1(b)).  uage of publication of the international application (under Rule 48.3(b)).  guage of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/						
3. Y	With	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international reliminary examination was carried out on the basis of the sequence listing:  contained in the international application in written form.  filed together with the international application in computer readable form.  furnished subsequently to this Authority in written form.  furnished subsequently to this Authority in computer readable form.  The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.							
4. [	$\boxtimes$	The ame	endments have resulted in the cancellation of: the description, pages the claims, Nos1 the drawings, sheets/fig						
5. [		This repo	ort has been established as if (some of) the amendments had not been made, since they have been considered to go the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**						
ai	* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).								
* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

May 18, 2000 (05.18.00)

#### Regarding claims 2 through 3

The inventions relating to claims 2 through 3 appear to be novel and involve an inventive step over documents 1 through 5 cited in the ISR.

Providing a "switching circuit" on a "shield wiring layer" is not described in any of the above documents; nor would it be obvious to a party skilled in the art.

#### Regarding claims 4 through 6

The inventions relating to claims 4 through 5 appear to be novel or involve an inventive step over documents 1 through 5 cited in the ISR.

Configuring a shield wiring layer preventing physical alteration with an upper shield wiring and lower shield wiring that intersect each other is not described in any of the above documents; nor would it be obvious to a party skilled in the art.

#### Regarding claims 7 through 12

The inventions relating to claims 7 through 12 appear to be novel and involve an inventive step over documents 1 through 5 cited in the ISR.

A constitution wherein a "shield wiring" intersects at an inclination with a "wiring forming an integrated circuit" is not described in any of the documents; nor would it be obvious to a party skilled in the art.
